

As I see it on the 470, you are asking for connection to the 9 sites in the district. I am only seeing a total of 7 on the schools website. Is there any way I could get the other locations that go with this 470/RFP?

We have an alternative school that was opened 2 years ago and was added to our sites last year and the district central office.

How much internet you are hoping to see come back in the bids?

We currently have 45Mbps using microwave towers. We are considering options for increasing this and you may submit proposals that provide us with a range of speed options.
